## S80 Batch Close

From the idle screen press **[FUNC]** to access the Function Menu.

Press **[2]** for the batch close options.

Press **[1]** to close the batch.

Note: The selections in the Batch Menu will vary with the Host Processor. With some there are a number of different choices but others start the batch process immediately.
The terminal will contact the host processor and print a batch report.
S80 Credit Refund

From the idle prompt select the **[F4]** button until RETURN displays.

Input the return amount and then press **[ENTER]**.

Swipe the card or manually enter the card account number and press **[ENTER]** and then if prompted enter the expiry date and press **[ENTER]**.

The terminal contacts the Host Processor for an approval and then prints a receipt.

Press any key to print the second receipt or press **[CANCEL].**

V/SALE

Input the transaction # to be voided and then press **[ENTER]**.

ENTER TRANS. #:
8█
The terminal searches the database for a Sale transaction that matches the criteria. Once found the transaction will be displayed, confirm the transaction and then press **[ENTER]**.
If the terminal does not find the transaction, it displays "TRANS NOT FOUND!" and returns to the idle screen.
If the transaction has already been voided, it displays "ALREADY VOIDED" and returns to the idle screen.
If the card is not the same one by which sale transaction is done, it displays "ACCOUNT MISMATCH" and returns to the idle screen.
View the transaction on the display to verify it is the correct transaction then press **[ENTER]**.
